

11 July 2012

The Manager Companies ASX Limited 20 Bridge Street SYDNEY NSW 2000

(19 pages by email)

Dear Madam,

PRESENTATION TO INVESTORS

I attach a presentation as delivered to investors.

For further information, please contact Grant Kensington on +61 2 9300 3310.

Yours sincerely

Peter J. Nightingale

Director

Disclaimer

This presentation contains certain forecasts and forward-looking information, including regarding possible or assumed future performance, costs, production levels or rates, prices, resources, or potential growth of Augur Resources Ltd (Augur), industry growth, or other trend projections. Such forecasts and information are not a guarantee of future performance and involve unknown risks and uncertainties, as well as other factors, many of which are beyond the control of Augur. Actual results and developments may differ materially from those expressed or implied by these forward-looking statements depending on a variety of factors.

No representation or warranty, expressed or implied, is made or given by or on behalf of Augur, any of Augur's directors, or any other person as to the accuracy or completeness or fairness of the information or opinions contained in this presentation and no responsibility or liability is accepted by any of them for such information or opinions or for any errors, omissions, misstatements, negligent or otherwise, or for any communication written or otherwise, contained or referred to in this presentation.

Accordingly, neither Augur nor any of the Augur directors, officers, employees, advisers, associated persons or subsidiary undertakings shall be liable for any direct, indirect or consequential loss or damage suffered by any person as a result of relying upon the statement or as a result of any admission in, or any document supplied with, this presentation or by any future communications in connection with such documents and any such liabilities are expressly disclaimed.

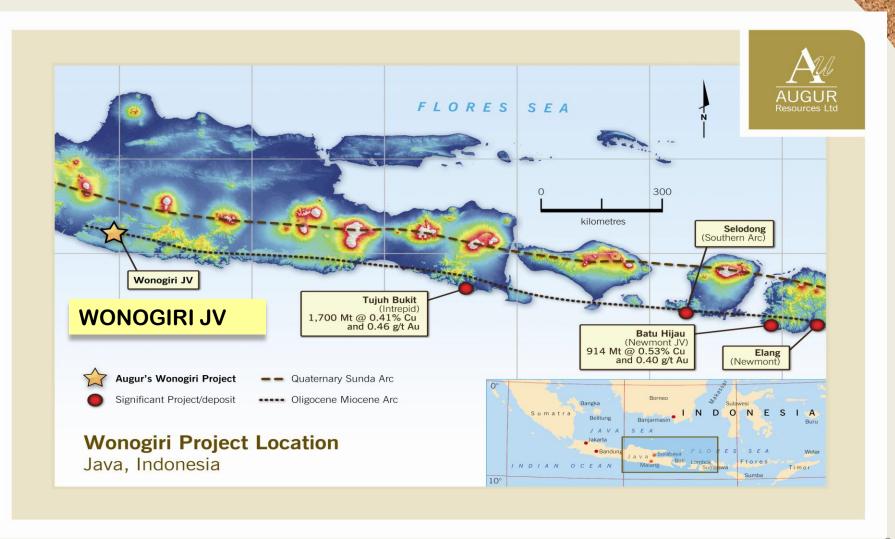

Nothing in this material should be construed as either an offer to sell or a solicitation of an offer to buy or sell securities.

Cautionary Note to U.S. Investors

This presentation may use the term "measured", "indicated" and "inferred" resources. We advise U.S. investors that the U.S. Securities and Exchange Commission does not recognize them. U.S. investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. In addition, "inferred" resources have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of inferred mineral resources will ever be upgraded to a higher category. U.S. investors are cautioned not to assume that any part or all of an inferred mineral resource exists or is economically or legally mineable.

Location

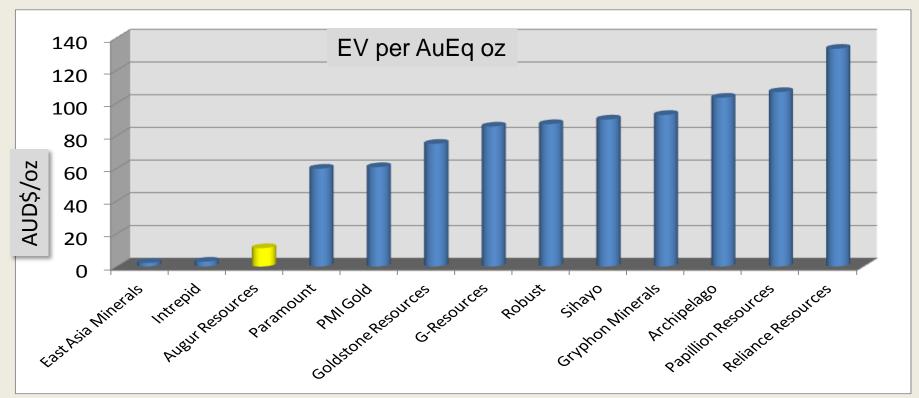

Maiden Resource Announced

• 1.54Mt Gold Eq resource

- 1.01 Moz gold
- 200 million pounds of copper

- Discovery cost: \$3.05/Oz
- Discovery time: 15 months
- Resource from surface

Average: AUD\$79 Augur: AUD\$11

Resource Model – Gold Mineralisation

AUGUR Resources Ltd

Randu Kuning Deposit

- 90.9 Mt @ 0.53 g/t AuEq
- Measured and Indicated
 33.7 Mt @ 0.81 g/t AuEq
- Mineralisation to surface
- Potential open pit extraction
- Open at depth
- Open to the south and west

Relative Level (m)

Investment Highlights

- 51% ownership of Wonogiri earning to 80% (<US\$225,000 to reach 80%)
- 1.54 Moz gold equivalent JORC mineral resource¹ estimated for Randu Kuning deposit:
 - 1.01 MOz of Gold
 - 200 million pounds of Copper
- >50 % of gold resource in JORC Measured category
- Plenty of upside potential in resource with 5 significant near surface targets
- Excellent metallurgical results: 82.7% recovery of gold and 94.1% of copper
- "Clear and Clean" title
- No forestry access restrictions over Randu Kuning deposit
- Experienced Board and management team

Development Schedule

- March June 2012: Maiden resource definition
- ➤ 2012 to 2013: Pre-feasibility study: Underway
- July September 2012: Preliminary mine design
- > 2012: Continuation of environmental baseline studies
- ➤ 2012: Continuation of metallurgical studies

Metallurgical

- Excellent recoveries in sulphide zone: 82.7% recovery of gold and 94.1% of copper and a possibility to increase gold recovery using additional gravity recovery
- Initial concentrate results returned >19% copper and 2 oz/t gold with silver credit (2.5 oz/t)
- Optimising work commenced to increase concentrate to >20% copper with early optimisation results returning 21.2% copper and 2.9 gold oz/t concentrate
- Majority of mineralisation floating off within
 5 minutes (very quick)
- Clean concentrate: very little arsenic, lead or zinc in deposit
- Testing of oxide resource underway

Infrastructure

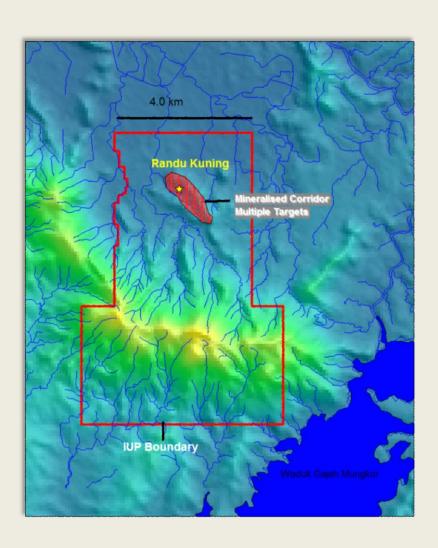

- Excellent infrastructure at site
- Sealed road to edge of deposit
- Man made water source directly east of the licence area and other water sources within licence area
- Grid power in local area, but capacity yet to be determined
- Potential work force in local region
- International airport at Solo (45 minutes drive from site) and about 11 daily flights to Jakarta and flights to Singapore

Other Targets

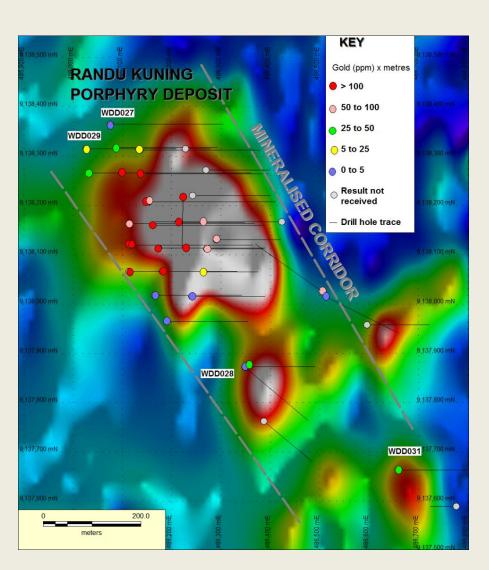

Multiple Targets

- Porphyry gold-copper mineralisation at surface at Randu Kuning
- Extensive low sulphidation epithermal veins over >2.5 km in strike length surrounding Randu Kuning
- Extensive geochemical anomalies in the northern half of the IUP with southern portion of IUP underexplored

Other Targets

- Drilling has indicated extensive goldcopper porphyry mineralisation from surface to below 400m depth
- Mineralisation remains open at depth
- High prospectivity of further mineralisation to the south and north of Randu Kuning
- The gold and copper mineralisation occurs within a north-west trending corridor of highly altered microdiorite to diorite host rocks

Other Targets – Progress Schedule

- 2012: Reassess current results
- 2012: Continuation of target definition
- 2012 2013: Continuation of exploration drilling
- 2013: Preliminary metallurgical testing if warranted

Summary

- ➤ + 1.5 MOz gold equivalent resource with >50% of gold resource in Measured category
- Excellent metallurgy characteristics
- > No forestry access restrictions over Randu Kuning deposit
- "Clear and Clean" title
- Optimised pit design to be undertaken
- Prefeasibility underway
- Experienced Board and management team

Thank You

ASX code: AUK

Statement of Compliance

The information in this report that relates to Exploration Results is based on information compiled by Augur staff and contractors and approved by Mr Grant Kensington, geoscientist, who is a Member of the Australasian Institute of Mining and Metallurgy.

Grant Kensington is a full-time employee of the Company who has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Grant Kensington has consented to the inclusion in this report of the matters based on his information in the form and context in which they appear.

Mineralisation cut-off used is 0.2 g/t gold and/or 0.2% copper with a maximum contiguous dilution interval of 4.0 metres. Sample intervals are generally either 0.5 metres or 1.0 metre. Assaying has been completed by PT Intertek Utama Services, a subsidiary of Intertek Group Inc. Blanks and/or independent standards are used in each sample batch at approximately 10.0 metre intervals. Mineralised intervals are reported as drilled depths. Insufficient data is currently available to determine the true width.

The resource information in this report that relates to Mineral Resources is based on information compiled by Mr Trevor Leahey and supplied by Augur Resources Ltd. Mr Leahey, is a Director of Computer Aided Geoscience Pty Ltd ("CAG") and qualifies as a Competent Person under the meaning of the 2004 JORC Code. He consents to the inclusion of these estimates, and the attached notes, in the form and context in which they appear.

Gold Equivalent results are calculated using a gold price of \$1,198/oz and a copper price of \$6,945/t. Silver is excluded from the gold equivalent calculation as no metallurgical testing of the recovery properties of silver from this project has occurred. In calculating the Gold Equivalents for the drilling results in the table above gold and copper recoveries are assumed to be 100%. As previously reported metallurgical testing has resulted in mean recoveries from sulphide material of over 82.5% for gold (Au) and 94% for copper (Cu). It is the Company's opinion that all metals used in the equivalent calculation have a reasonable potential to be recovered in the event that material from the Wonogiri project was to under go processing.

The gold equivalent calculation used is:

Randu Kuning Resource Summary

							A STATE OF THE STA
JORC Category	Tonnes (M)	Au Eq (g/t)	Au (g/t)	Cu (%)	AuEq (Oz)	Au (Oz)	Cut-off (g/t AuEq)
